

CLASSIC MICROWAX

floor and joinery nourishment

A rejuvenating maintenance system for oiled timber, cork, concrete, unglazed tiles and slate floors; furniture and joinery. This product will clean, protect and improve the surface. Classic Microwax is made from carnauba wax, emulsified in purified water with essential oils, it dries to an extremely hard and durable finish. The secret of this formulation is the tiny molecular size of the wax, enabling constant use without

creating a film or build up on the surface of the timber.

An easy to apply liquid which can also be buffed undiluted onto an oiled floor or bench to provide a rich patina.

Most importantly, floors finished with Java Resin Oil or Osmo Polyx Oil should be damp mopped weekly using 3 capfuls of Microwax in your wash water, to maintain and improve the surface.

Completed sq/mtr cost \$2.00

Use: Classic Microwax emulsion is made from natural raw materials and protects against dirt and mechanical wear. Microwax dries quickly and creates a silky satin, breathable, dirt and water repellent finish. Even after extensive application, it does not form a hard to remove build up. It is designed to feed and maintain the timber's patina.

Application: If you wish to enrich the patina, you can apply Microwax undiluted to all oiled and varnished floors/surfaces which have been allowed to completely dry. Using a soft, lint free cloth apply a very thin even coat to the surface, wait 20-30 minutes and buff to a satin sheen. On heavy traffic floors this procedure can be repeated at regular intervals.

Maintenance: For weekly cleaning and maintaining floors and surfaces, damp mop using Classic microwax, 3 tablespoons into 5 litres of warm water and natural detergent.

Safety Instructions: Keep out of reach of children. Do not pour residue into the sewer.

Composition: Water, canauba wax, fatty acid-alcohol-ester, lavender oil. plant based surfactants.
